Primary Examiner, Art Unit 1626

DETAILED ACTION

Claims 1-6 and 8-14 are currently pending in the instant application, appear allowable over the prior art of record and have been renumbered as claims 1-13. Applicants' amendment filed 30 July 2009 has overcome the 35 USC 112 1st paragraph rejection. Accordingly, the examiner has searched and examined claims 1-6 and 8-14 in their entirety according to MPEP 803.02. The objection to the claims as containing non-elected subject matter is therefore withdrawn.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jennifer Branigan on 30 November 2009.

The application has been amended as follows:

1. Amend the first page of the specification, on the line following the title, by inserting the following continuing data:

-- This application is a 371 of PCT/EP04/07938 filed July 16, 2004.--

2. Cancel claims 15-28.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance. This invention relates to a process of preparing formula I by reacting a compound of the formula II

which has a pKa value of less than or equal to 3 with 5-chloro-2,3-dihydro-1,4-dioxin to give a compound of the formula III which is then cyclised to give a compound of the formula I. The novel and nonobvious aspect of this invention involves reacting formula II which has a pKa value of less than or equal to 3 with 5-chloro-2,3-dihydro-1,4-dioxin to give a compound of the formula III. The closest prior art of record fails to teach or suggest the instantly claimed invention as applicants have surprisingly found that arylamines, so long as they have a pKa of less than or equal to 3, also react with 2-chlorodioxene to give 2-(2-chloroethoxy)acetamides. This is unexpected since amines such as ammonia, benzylamine, 8-amino-quinoline or 4-methoxyaniline do not react or react very poorly, see page 6 of the instant specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Rebecca L. Anderson whose telephone number is (571) 272-0696. Mrs. Anderson can normally be reached Monday through Friday from 6:00am until 2:30pm.
